

THE CUTTING EDGE

New Fabrication Brewing With History

Redeveloping vintage, historic buildings can be fraught with challenges. [The Zilber Group](#), working through KM Development, renovated a building in the [Pabst Brewery](#) complex for the [University of Wisconsin-Milwaukee School of Public Health](#). Stairs, railings, support steel, and balcony rails are just some of the architectural elements they called upon Grunau Metals to fabricate and install. Working with carbon and stainless steel, Grunau Metals created these elements to achieve the "high industrial look" that architectural firm [Eppstein-Uhen](#) specified. According to [Grunau Metals](#) own Dave Douglas, "fabricating new components that blend well with existing antique components was a challenge, but one we were able to meet." Click here to see [additional photos](#). The vintage Pabst Brewery complex is of important historic value to the City of Milwaukee, and its renovation will extend the life of this important historic site for generations to come.

GRUNAU METALS
