

# THE CUTTING EDGE

## Kangaroo Bridge Handrails

Milwaukee's Marsupial foot and bicycle bridge hangs below the Holton avenue bridge, much like the pouch on a kangaroo. Grunau Metals was asked to build the T-shaped post and stanchion, stainless steel hand rails that keep people on the walkway. Using plate and bar stock along with Brazilian wood, the hand rails were carefully fabricated in their shop so they could be easily assembled, over water, at the site. Grunau Metal's meticulous work provided the finishing touches on a unique bridge. Take a moment sometime and "hang" out on Milwaukee's marsupial bridge.
