

August 31, 2015

We are pleased to announce that Bill Ball joined Grunau Company as our new President effective August 31, 2015 to guide Grunau into the future.

Bill came to us through our parent company APi Group, Inc. where he completed the Leadership Development Program (LDP), rotating through several APi sister companies, including Grunau in 2009. The LDP program was designed by APi to hire candidates with superior leadership potential, often from a military background, to groom for future leaders. In 2010, Bill was hired by Delta Fire Systems (a subsidiary of APi Group) in Salt Lake City, Utah. His career progressed from Project Manager to Operations Manager. He was promoted to President of Delta in June 2012. Bill's thoughtful, determined leadership style will be a good fit for Grunau Company.

Welcome to the team, Bill!
