GRUNAU COMPANY TAPPED FOR GE HEADQUARTERS

OAK CREEK, Wis. (February 23, 2005) — Grunau Company announced today that it has been hired to complete the design/build and installation of the HVAC system for the new \$85 million headquarters that will house three GE Healthcare divisions.

Due to the building's large footprint, the construction has been divided into sections which liken it to seven smaller buildings. The sections make it possible for the interior trades to begin earlier and progress faster because the structure and enclosure can be completed for one section before others are ready.

"On most projects, we are able to work on the entire floor. The segmented construction method requires a lot of coordination," said Jeff Kuhnke, project manager. "We are working closely with the general contractor and other trades to keep the tight construction sequence on schedule."

The 475,000-square-foot development is located in the Milwaukee County Research Park in Wauwatosa, Wis. The new building will consolidate approximately 1,400 GE Healthcare employees from Menomonee Falls, Milwaukee and West Milwaukee. When completed at the end of the year, it will be the third-largest office building in the Milwaukee area.

Formerly known as GE Medical Systems, GE Healthcare is a \$14 billion unit of General Electric Company, a technology, media and financial services company with more than 300,000 employees worldwide.

The Grunau Company's team of skilled professionals designs, installs and services mechanical systems, including HVAC, plumbing, fire protection and specialized electrical systems. Grunau Metals, a separate division of the company, offers specialty metal fabrication services. Grunau teams operate as customer advocates, pinpointing the best solutions to complex projects and embracing a strategic approach to identify and prevent problems. Grunau has offices in Wisconsin, Florida, Indiana, Ohio and Pennsylvania. Grunau, established in 1920, employs 500 people and is headquartered in Oak Creek, Wis.
